

2010 HIGHEST RANKED WILDLIFE HABITAT BY ECOLOGICAL CONDITION

 Highest Ranked Habitat in NH

 Highest Ranked Habitat in Biological Region

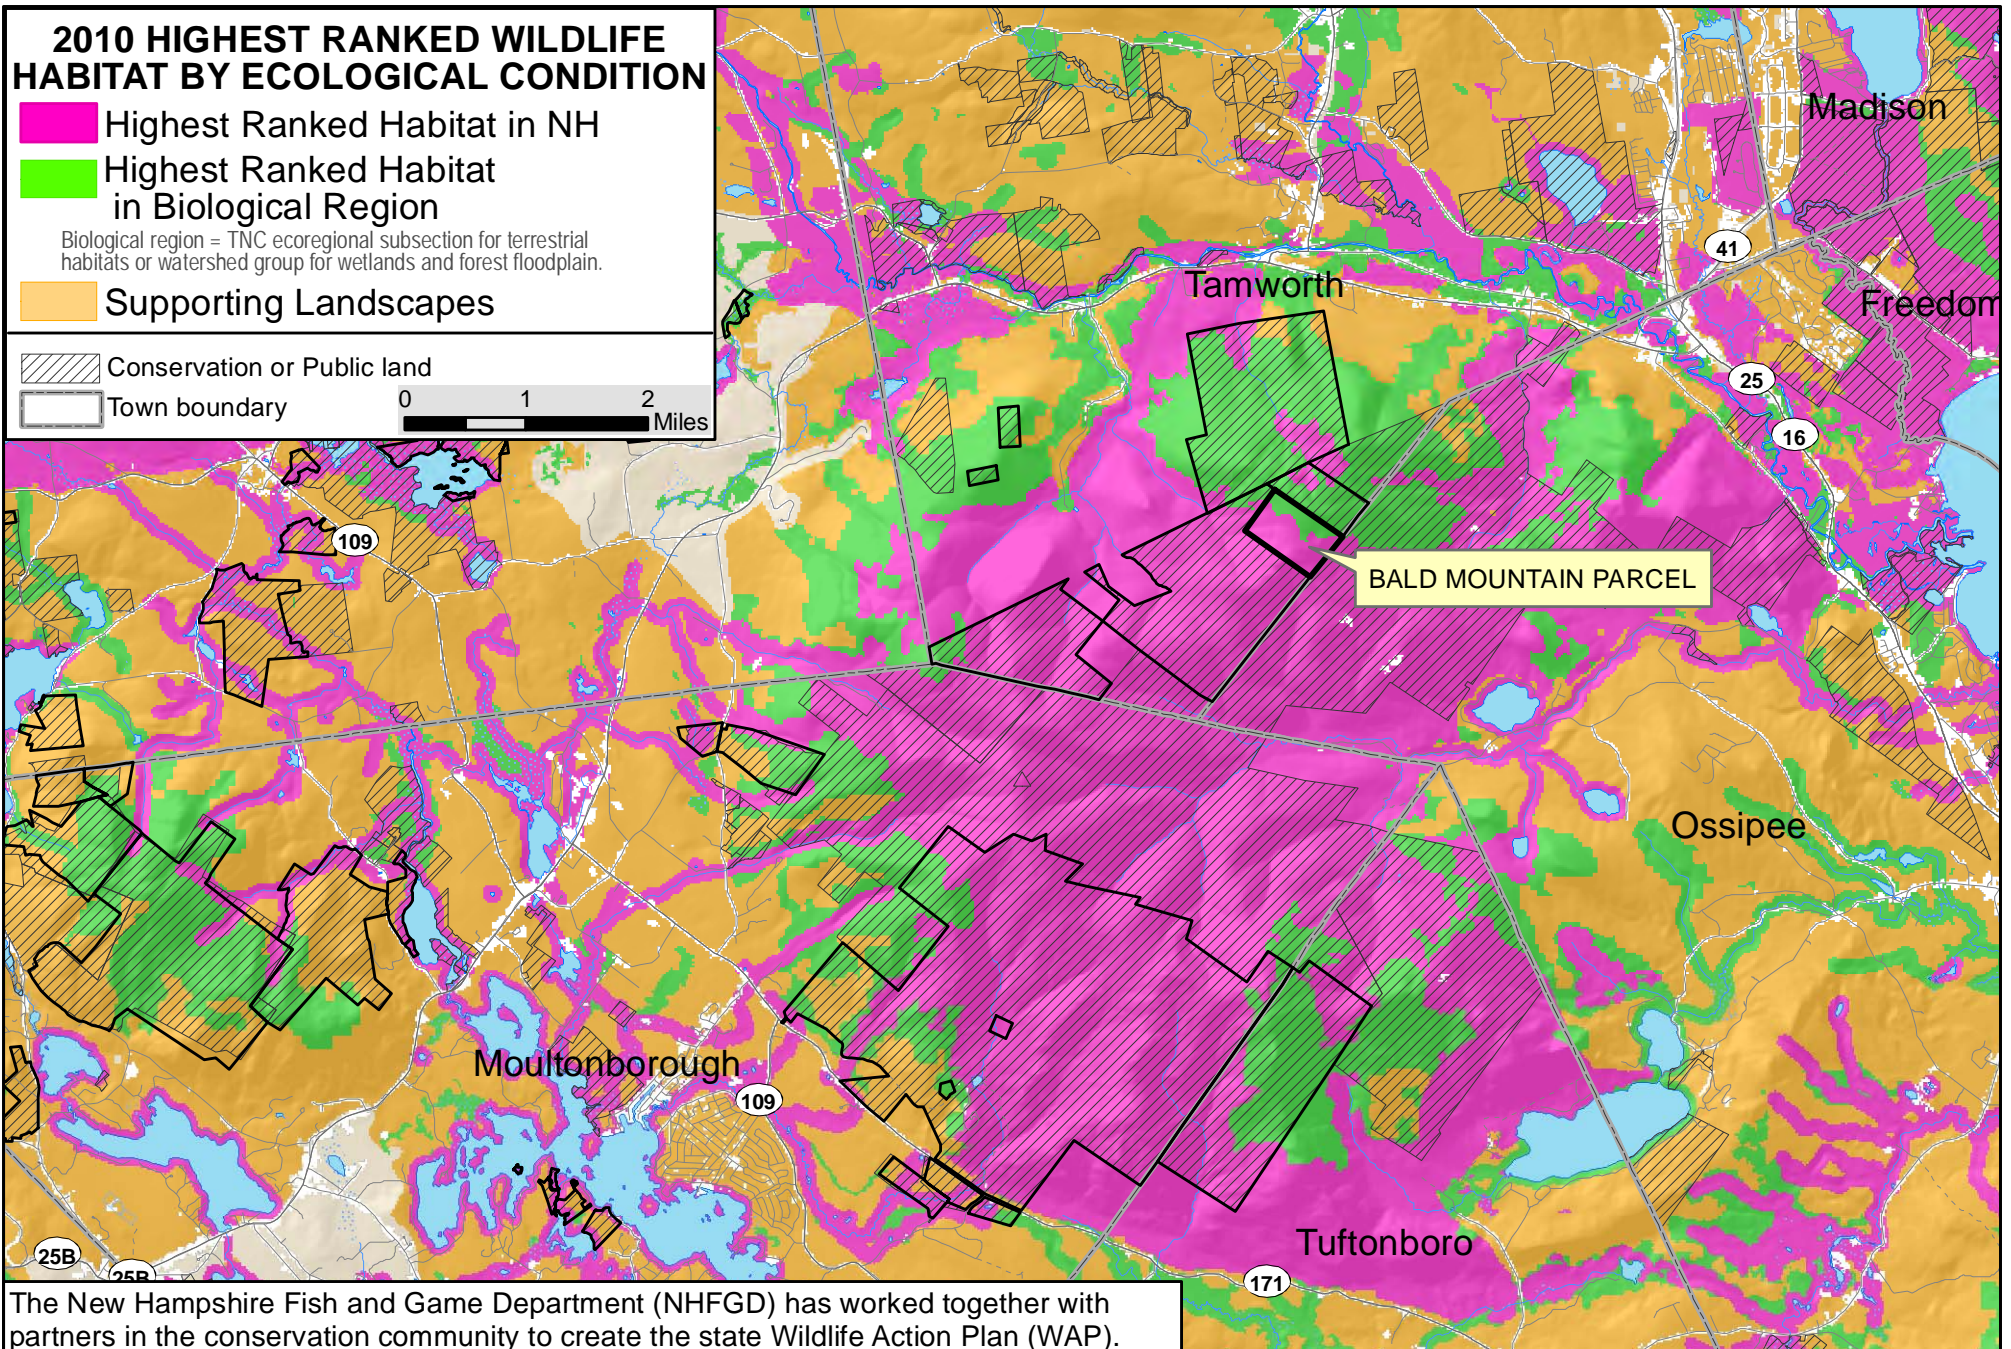

Biological region = TNC ecoregional subsection for terrestrial habitats or watershed group for wetlands and forest floodplain.

 Supporting Landscapes

 Conservation or Public land

 Town boundary

0 1 2 Miles

The New Hampshire Fish and Game Department (NHFGD) has worked together with partners in the conservation community to create the state Wildlife Action Plan (WAP). The plan provides New Hampshire decision-makers with important tools for restoring and maintaining critical habitats and populations of the state's species of conservation and management concern. It is a pro-active effort to define and implement a strategy that will help keep species off of rare species lists. Funding was provided by State Wildlife Grants administered by the US Fish & Wildlife Service.
